

2021

National Formulary

2nd Quarter Edition

Last Revised: 04/30/2021

Version 2021Q2b

Table of Contents

OVERVIEW	4	CARDIOVASCULAR (HEART) DRUGS	14
COVERAGE LIMITATION	4	Alpha & Beta Blockers	14
COMPOUNDED DRUGS	4	Antihypertensive Combinations	14
DRUG PLACEMENT DETERMINATION	4	Calcium Channel Blockers (CCBs)	14
PREFERRED BRAND PRODUCTS	5	ACE Inhibitors without & with Diuretics	15
GENERIC SUBSTITUTION	5	ACE Inhibitors / CCB Combinations	15
SINGLE & DUAL SOURCE GENERICS	5	ARBs without & with Diuretics	15
PRIOR AUTHORIZATIONS, STEP EDITS & QTY LIMITS	6	ARB Combinations	15
EXCLUDED DRUGS	6	Naprilysin Inhibitors	15
NON-LISTED DRUGS & DRUG CATEGORIES	7	Diuretics	15
FORMULARY MODIFICATIONS & CHANGES	7	Renin Inhibitors	16
BIOSIMILARS	7	Antiarrhythmics/Anti-Ischemic	16
MAJOR CHANGES TO THE PDL	7	Cardiac Glycosides	16
ANTIBIOTICS	8	Vasodilators, Coronary, Nitrates/Vasodilators, Sympatholytics	16
Penicillins & Cephalosporins	8	Other Drugs	16
Tetracyclines	8		
Macrolides & Clindamycins	8		
Sulfonamides, Sulfones & Ketolides	8		
Quinolones	8		
Miscellaneous Antibiotics	8		
ANTI-VIRALS	9		
General Antivirals	9		
HIV Antiviral Drugs	9		
HIV Pre-Exposure Propylaxis Drugs	9		
ANTI-INFECTIVES	10		
Anaerobic Anti-Infectives	10		
Antiparasitics	10		
Antimalarials & Antiprotozoals	10		
Antihelminthic Drugs	10		
ANTIEMETICS	10		
NEUROLOGIC DRUGS	11		
Anti-Parkinsons Drugs	11		
Anti Migraine Drugs	11		
Alzheimers Drugs	12		
Anti-Convulsants & Anti-Epileptics	12		
Fibromyalgia, Neuropathic Pain / PHN Drugs	12		
Restless Leg Syndrome (RLS)	12		
BLOOD MODIFIERS	13		
Anticoagulants / Anti-A10 / Thrombin Inhibitors	13		
Heparin Related Drugs	13		
Platelet Aggregation Inhibitors / DVT	13		
Other Drugs	13		
CARDIOVASCULAR (HEART) DRUGS	14		
Alpha & Beta Blockers	14		
Antihypertensive Combinations	14		
Calcium Channel Blockers (CCBs)	14		
ACE Inhibitors without & with Diuretics	15		
ACE Inhibitors / CCB Combinations	15		
ARBs without & with Diuretics	15		
ARB Combinations	15		
Naprilysin Inhibitors	15		
Diuretics	15		
Renin Inhibitors	16		
Antiarrhythmics/Anti-Ischemic	16		
Cardiac Glycosides	16		
Vasodilators, Coronary, Nitrates/Vasodilators, Sympatholytics	16		
Other Drugs	16		
ANTIHYPERLIPIDEMIC (CHOLESTEROL) DRUGS	17		
Statins & Statin/CCB Combinations	17		
Bile Acid Sequestrants, Liver Drugs	17		
Fibrates	17		
ACL Inhibitors	17		
Other Drugs	17		
PANCREATIC DRUGS	18		
KIDNEY & URINARY / UROLOGICAL DRUGS	18		
Benign Prostate Hyperplasia	18		
Urologic Drugs / Other Drugs	18		
Erectile Dysfunction Drugs	18		
Gout Drugs – Purine Inhibitors	19		
Urinary Ph Modifiers	19		
Potassium & Electrolytes	19		
Phosphorus/Calcium/Electrolyte Depleters	19		
OSTEOPOROSIS (BONE) DRUGS	20		
ANTI-INFLAMMATORY / ANALGESIC (PAIN) DRUGS	20		
Anti-Inflammatory Drugs (NSAIDS)	20		
COX-II Drugs	21		
Analgesics, Narcotics (Opioids)	21		
Analgesics, Salicylates, Non-Salicylates, Other	21		
CENTRAL NERVOUS SYSTEM DRUGS	22		
Anti-Anxiety Drugs (Benzodiazepines)	22		
Sedative/Sleeping Drugs	22		
A.D.D. & A.D.H.D. Drugs (Stimulants & Non-Stimulants)	22		
Excessive Sleepiness / Narcolepsy	22		
Serotonin Selective Reuptake Inhibitors (SSRIs)	23		
Serotonin-Norepinephrine Reuptake Inhibitors (SNRIs)	23		
Other SSRI Combinations	23		
Monoamine Oxidase Inhibitors (MAOIs)	23		
Antidepressants, Other Drugs	23		
Pseudobulbar Affect (PBA) Drugs	23		
Antipsychotic Drugs	24		
Atypical Antipsychotic Drugs	24		
Bipolar Disorders (Anti-mania)	24		

GASTROINTESTINAL DRUGS	24	OPHTHALMIC (EYE) DRUGS	38
Parathyroid Drugs	24	Anti-Infectives	38
Anti-Ulcer / GERD Drugs	25	Antihistamines	38
Bowel Preps	25	Immunomodulators	38
Irritable Bowel Syndrome (IBS) Drugs	25	Mast Cell Stabilizers	38
Laxatives	26	Anti-Inflammatory Drugs	38
Colon Prep Drugs	26	Glaucoma	39
H. Pylori Drugs	26	Mydratics	39
		Antibiotic/Corticoid Combination Drugs	39
		Other Drugs	39
CONTRACEPTIVES & HORMONE THERAPY DRUGS	27		
Contraceptives	27	OTIC (EAR) DRUGS	40
Estrogens / Estrogen Combinations (Hormone Replacement)	27		
Other Drugs (Hormonal & Non-Hormonal)	28	MISCELLANEOUS PRODUCTS	41
Endometriosis Drugs	28	Dependence & Withdrawal Symptom Drugs	41
Progestinal Drugs	28	Smoking Cessation Products	41
Androgenic Drugs	28	Saliva Substitutes	41
PRESCRIPTION VITAMINS	29	Parasympathetic Drugs	41
Pre-Natal Vitamins	29	Rescue Drugs	41
Iron Deficiency Drugs	29		
CORTICOSTEROIDS, THYROID MEDICATIONS	29	SPECIALTY DRUG PRODUCTS	42
Anti-Thyroid & Thyroid Replacements	29	Specialty Drug Products	42
Corticosteroids / Mineralocorticoids (Systemic)	29	Specialty Program & Limits	42
METABOLIC DRUGS	30	Specialty Drug Product Qualifications	43
Insulins (Synthetic, Human & Inhaled)	30	Antivirals – Hepatitis B (Hep B)	44
Injectable Anti-Diabetics	30	Antivirals – Hepatitis C (Hep C)	44
GLP-1, GLP-1 / Insulin Combinations	30	Multiple Sclerosis (MS)	44
Oral Anti-Diabetics	31	Rheumatoid Arthritis (RA)	45
TZDs, DPP-4 & Combos	31	Psoriatic Arthritis & Plaque Psoriasis	45
SLGT-2 Inhibitors, SLGT-2 Inhibitors/DPP-4 Combinations	31	Ulcerative Colitis (UC) & Crohn's Disease (CD)	45
Hyperglycemic Drugs	31	Methotrexate & Other UC/CD Drugs	46
DIABETIC PRODUCTS	32	Atopic Dermatitis	46
Diabetic Supplies (Meters, Strips, Lancets/Devices, Syringes & Supplies)	32	Osteoarthritis	46
Glucose Monitoring Devices	32	Cholesterol Management (PCSK9/Others)	46
Insulin Pumps & Supplies	32	Human Growth Hormones (HGH)	46
ANOREXIA DRUGS	32	Injectible Antipsychotics	46
RESPIRATORY & NASAL DRUGS	33	Cardiovascular – PAH, HAE, Other Drugs)	47
Oral Allergy Drugs	33	Extreme Respiratory	47
Allergy Medications, Asthma Drugs	33	Immunosuppressants (Transplant & Blood Cell Proliferation)	47
Glucocorticoid Steroids / Inhaled & for Nebulization	33	Immunosuppressants (Lupus)	48
Leukotriene Inhibitors	34	Heparin & Hematopoietic Drugs	48
COPD Drugs	34	Osteoporosis	48
Nasal Polyps	34	Cataplexy/Narcolepsy	48
DERMATOLOGICAL (SKIN) DRUGS	35	Infertility	48
Acne, Rosecea & Seborrhea Products (Oral & Topical)	35	Interuterine Devices	49
Antifungals (Oral & Topical)	35	Sickle Cell Anemia Treatments	49
Psoriasis Drugs (Oral & Topical)	36	Other Drugs	49
Keratolytic Drugs	36		
Scabies & Pediculosis Drugs	36		
Topical Immuno Drugs (Non-steroidal)	36		
Atopic Dermatitis	37		
Topical Local Anesthetics & Analgesics	37		
Hyperhydrosis	37		
Other Topical Products	37		
		MISCELLANEOUS NOTES	50
		CLINICAL GUIDELINES	51

Overview

The **Clinically Preferred Drug List** or “**PDL**” is a continually updated list of prescription medications that represents the current clinical judgement of our clinical team, providers and experts in the diagnosis and treatment of different diseases. It contains clinical prescribing information that assists health care professionals when prescribing the highest quality affordable drugs to patients. The PDL represents the efforts of our clinical team to a method to evaluate the various drug products available. *Note that not all drugs that are available are listed in this document ... just those that are the most commonly dispensed by general practitioners and specialists. There are thousands of generic drugs for effective products that are readily available not listed in this book.* The PDL shows both generic and brand names for reference and convenience. Some plan sponsors, HMOs or Health Plans, Unions or Employers may be provided with the option of imposing further restrictions or choose not to reimburse some products listed in the PDL.

Additionally, as drug prices increase, new specialty drugs are released, and brand drugs lose patent, limiting drug selection to preferred products (generics, brands, as well as specialty) has become more critical. Our clinicians work to manage a balanced formulary, offering the best clinical products based on (1) safety, (2) efficacy, (3) availability, (4) lowest potential for abuse, (5) limited side effects, (6) viable clinical alternatives, (7) patient educational needs & availability, and finally (8) cost. While a very high percentage of plan designs follow this formulary, some small percentage may make plan design modifications and/or apply their own clinical management parameters.

Coverage Limitation

The PDL does not provide information regarding specific coverage, limitations or exclusions, member out-of-pocket costs (known as “member contributions” or more commonly “copays”) that may be assigned at plan level. The PDL applies to out-patient drugs provided to members, and *does not apply* to medications used in the in-patient setting (with the exception of some physician administered office products). All applicable dosage forms and strengths of a particular drug are included in the PDL under the specific entry unless otherwise noted and listed separately.

Compounded Drugs

Our Pharmacy & Therapeutics Committee (“P&T Committee”) has recommended against the coverage of compounded products. This decision was based on our research that compounds are not currently FDA approved as indicated for therapeutic use. Compounds have not passed the standards of clinical safety nor clinical efficacy that the FDA has set for authorization to be used in human diseases. Furthermore, due to ongoing reports concerning compounded pharmacy products causing harm for their intended patients, the P&T Committee has decided to take a prudent position against approval of compounding products to keep the safety and best interests of our members as its highest priority. If you have any questions, please contact your account executive.

While the P&T Committee does not recommend the use or coverage of compounds, we maintain that every patient has the right to order, and pharmacies have the right to dispense, compounded drugs at their own risk and expense. Please note that some plan benefits may opt to include them on a limited basis.

Drug Placement Determination

New Drugs are constantly being developed and approved by the FDA for the treatment of the different disease states. Due to vast availability of medication therapies and treatments, a reasonable process of drug selection and drug usage has been developed. The goal of the PDL is to enhance the physicians’ and pharmacists’ abilities to provide optimal cost-effective drug therapies to patients.

The development, maintenance, and improvement of the PDL are evolutionary processes that require the constant attention of our P&T Committee. As stated above, the PDL is a continually reviewed and revised list of drug products that mirrors the prevailing clinical opinion of the P&T Committee. Unfortunately, this dynamic process does not allow this document to be completely accurate in official print at all times. Updates are provided as necessary through newsletters and updates made readily available on the Internet for members, physicians, pharmacists and plan sponsors.

New Drugs being considered for formulary inclusion will be reviewed for their safety, efficacy, FDA-approved indications, contraindications, side effects, pharmacokinetic profile, patient compliance potential, drug cost and effects on other indirect health costs. A thorough medical literature review will place an emphasis on the following characteristics:

- Safety and Effectiveness of Product
- Potential for Patient Clinical or Utilization Abuse
- Comparison Studies with Similar Products if available
- Therapeutic Outcomes and Economic Data

Drugs that are given a "priority" review by the FDA will be reviewed for possible inclusion into the formulary in as little as 7 days if necessary. New drugs will have their characteristics compared to other similar drugs within a therapeutic class when available. New drugs that are added to an existing therapeutic class may result in the deletion of other drug(s) within the particular therapeutic class as clinical applications warrant. This process ensures the selection of the most clinically useful and cost-effective drugs within a specific therapeutic class.

Preferred Brand Products

Brand drugs (listed in bold) that are added to the PDL in the "Preferred Brand" column include those that offer a clinical and/or cost advantage over other existing comparable brand drugs (listed under "Non-Preferred Brands") without sacrificing safety or effectiveness. Drugs will not be placed in either column if there currently is insufficient clinical evidence of its appropriate clinical effectiveness.

Brand drugs, whose generic form is also listed in the "Generic Drugs" column, should be considered as Non-Preferred brands as there have readily available generic equivalents. Brand drugs listed in the "Generic Drugs" column that have a caret (^) are considered Preferred Brands with preferred brand copays. Brand drugs listed in the "Generic Drugs" column that have a hash or pound sign (#) are brand drugs with generic copays. Copays as always are part of the member's defined benefits and vary by plan for brands and generics for standard and specialty drugs.

Brand drugs that may vary from formulary to formulary are notated with an asterisk (*). Brand drugs that have RECOMMEND next to their name may not have any tier limitations in place, although they are subject to the copay tier assigned.

Brand drugs that are crossed out (i.e. **Drug Name**) are no longer marketed but are available generically.

Exclusions & Grandfathering: Patients on continuous therapy of a Non-Preferred brand that may excluded or is in a higher formulary tier may continue to take these drugs at the Preferred Brand copay until therapy is discontinued (called "grandfathering"). Restart of such brand drugs may require restart of therapy and may be charged the higher Non-Preferred Brand copay.

Generic Substitution

Whenever available, lower cost generic drugs approved by the FDA should be used regardless of the brand name indicated. Generic drugs provide the patients with a more cost effective, chemically and therapeutically equivalent option that can reduce the patient's out of pocket cost. Generic drugs will be listed in the "Generic Drugs" column, or in parenthesis next the brand drug name in the "Preferred Brands" or "Non-Preferred Brands" columns. The brand drugs listed under the "Generic Drugs" column are for reference only, do not have a generic copay, and do not guarantee coverage. This statement is not meant to preclude or override any state statutes that may exist (e.g., Non-Substitutable Drugs). Inclusion of a brand drug for generic substitution is subject to the following:

- An FDA Rating of "A" for generic equivalency as well as thorough review by the P&T Committee for efficacy and safety
- A narrow therapeutic index that makes it not subject to substitution due to complex pharmacokinetics, dosage forms, etc.

Single & Dual Source Generics

Upon patent expiration, brand drugs become available from one or more generic manufacturers. If the brand drug becomes available from only one generic manufacturer – typically for an exclusivity period or when other competing generics are removed from the market – the generic drug is called a "*Single Source Generic*" or SSG. If a brand drug becomes available from two (2) manufacturers, the generic drugs are called "*Dual Source Generics*" or DSG; if a brand drug is available from many generic

manufacturers, it is then called a “*Multi-Source Brand*” or MSB, while the generic drugs are called “*Multi-Source Generics*” or MSG.

While a generic drug is a SSG or DSG, its price may only be slightly cheaper than the original equivalent brand drug. During this time, at the clinical team’s recommendation, the SSG or DSG may be priced according to one of the following algorithms:

- GENERIC discount with a GENERIC copay
- GENERIC discount with a BRAND copay
- BRAND discount with a GENERIC copay
- BRAND discount with a BRAND copay
- NDC blocked so that the member must buy the BRAND at the full cash price (100% copay) with our discounts being applied

Prior Authorizations, Step Edits & Quantity Limits

Prior Authorization: Some brand drugs may require approval called “prior authorization” before the prescription can be dispensed. If a drug requires prior authorization, it may be noted in this PDL with either a ^{P/A} or ^{P/A Req'd}. Note that your plan may also restrict specific drugs and require a Prior Authorization that may not be shown on this PDL.

When a Prior Authorization is required, one or more of the following criteria must be fulfilled before the Prior Authorization will be issued:

1. Patient must have failed an appropriate trial of generics or other clinically Preferred Brand drugs (“step edit” – see below).
2. Use of a Preferred Brand drug(s) may cause documented underlying conditions or side effects, which would be detrimental to the patient’s health.
3. The treatment algorithm for that disease state is being followed according to the generally accepted published guidelines or the protocol in the FDA approved package insert.
4. A more cost effective, clinically equivalent agent is available as the Preferred Brand Drug.

Step Edits: Many drugs on the PDL may have specific step edits or quantity limits. A “step edit” is the process where another drug may be required to be used first before the prescribed drug is covered. Such drugs requiring use of another drug before it can be dispensed will be indicated in this PDL with an ^{S/E} or an ^{S/E-2}.

Quantity Limits: Our clinical team strongly recommends that some method of utilization compliance, including quantity limits, be placed on many drugs. Many products may have quantity limits implemented in your plan benefit design that are consistent with their FDA approved package insert or appropriate clinical guidance to control utilization. They are not specifically marked in this PDL.

More information on specialty drug restrictions are detailed at the end of this PDL.

100% Copay vs. Excluded Drugs

Our P&T Committee and clinicians believe that drug exclusions limit the choice of physicians and patients in treating specific conditions. Some drugs are manufactured simply for patient convenience at a much higher price than available equivalent generic drugs, or have other brand drug options available at a much lower net cost. To maintain a complete patient profile of drugs, managed clients should *not* exclude the drugs indicated with ^{100% Copay} but instead cover them at the 100% copay to the patient, with strong encouragement that the patient use manufacturer copay cards to reduce the patient’s out of pocket costs. If a patient is already on one of the drugs listed with a star (*), therapy should be continued at the non-preferred copay.

The list includes but is not limited to:

Avuvi-Q**	Edecrin	Noxfil	Steglatro
Cambia	Elyxyb Soln	Pennsaid 2%**	Steglujan
Carospir Soln	Enteragam	Pexeva	Taperdex
Conjupri	Epaned	Prexartan	Tivorbex
Consenси	Evizio	Qbrelis Soln	Treximet
Cycloset	Fortamet ER	Rayos**	Vimovo
Duexis**	Glumetza	Riomet	Vivlodex
Durlaza	Katerzia	Sitavig	Yosprela
Dyloject	Millipred Pak	Segluromet	Zorvolex

** May be covered by some plan benefit designs at standard copay. 100% copay applies if P/A protocols are not met

Non-Listed Drugs & Drug Categories

Drug categories that are not specifically listed in the book are generally categories of lower utilization where generic products are readily available (i.e. cough & cold) and shall be driven by plan design if covered. A specific brand drug may be “preferred”, “non-preferred” or “non-formulary” depending on the class.

Additionally, if a specific drug is not listed in the PDL, the drug is categorized under a general statement (such as that of HIV products on page 9), is covered under a medical benefit due to the location of administration, or is in a therapeutic class generally not seen in managed care. Oral products (other than oral oncology drugs) that are not listed should be considered as having a Non-Preferred brand copay.

Formulary Modifications & Changes

Changes may be made to this PDL at any time based on availability or market conditions. Drugs approved by the FDA are added as Non-Preferred Brands with the same restrictions as other Non-Preferred Brands in the same clinical equivalent drug class until they are reviewed by the P&T Committee unless the clinical team determines that the product is a “line extension”. Drugs that are NOT listed in this book when the competitors are should be considered as excluded, not covered, or non-preferred drugs.

Biosimilars

The FDA acknowledges a biosimilar drug as a specialty product that is highly similar to and has no clinically meaningful differences from an existing FDA-approved reference product, and listed in the FDA Purple Book, with the following definitions:

- “Highly Similar” means that a manufacturer developing a proposed biosimilar demonstrates that its product is highly similar to the original brand drug product by extensively analyzing (i.e., characterizing) the structure and function of both the reference product and the proposed biosimilar.

- “No Clinically Meaningful Differences” means that the manufacturer must demonstrate that its proposed biosimilar product has no clinically meaningful differences from the original brand drug in terms of safety, purity, and potency (safety and effectiveness).

Changes to the PDL

The following changes have been or will be implemented on the date shown. Placement of new drugs can be found in the formulary newsletter.

Drug	Disease State	Date	Change
No Changes			

Antibiotics

GENERIC DRUGS	PREFERRED BRANDS	NON-PREFERRED BRANDS
Penicillins & Cephalosporins <i>Multiple Generics available for Prescribing</i> W1		Cedax (Ceftibuten) Spectracef (Cefditoren Pivoxil) Suprax (Cefixime) <small>S/E</small>
Tetracyclines Doxycycline (various) / Doryx , Vibramycin Minocycline / Minocin , Dynacin , Solodyn <i>Multiple Generics available for Prescribing</i> W1		Acticlate (Doxycycline Hyclate) Oracea (Doxycycline Monohydrate)
Macrolides, Clindamycins & Ketolides <i>Multiple Generics available for Prescribing</i> W9		Ketek (Telithromycin)
Sulfonamides, Sulfones & Nitrofurantoin <i>Multiple Generics available for Prescribing</i> W2		Furadantin Liquid (Nitrofurantoin)
Quinolones Ciprofloxacin / Cipro , Cipro XR Levofloxacin / Levaquin Moxifloxacin / Avelox Ofloxacin / Floxin W1		Baxdela (Delafloxacin) <small>S/E</small> Factive (Gemifloxacin) Noroxin (Norfloxacin)
Miscellaneous Antibiotics Vancomycin / Vancocin Linezolid / Zyvox W1	Dificid (Fidaxomycin [~])	FirVanq (Vancomycin)

Antivirals

GENERIC DRUGS	PREFERRED BRANDS	NON-PREFERRED BRANDS
General Antivirals <u>Antivirals:</u> Acyclovir / Zovirax Amantadine / Symmetrel Famciclovir / Famvir Ganciclovir / Cytovene Valacyclovir / Valtrex Valganciclovir / Valcyte W5	<u>Antivirals:</u> <u>Flu Treatment/Flu Prevention:</u>	<u>Antivirals:</u> Sitavig (Acyclovir) 100% Copay Prevymis (Letermovir) P/A Req'd <u>Flu Treatment/Flu Prevention:</u> Relenza (Zanamivir) Xofluza (Baloxavir Marboxil)
<u>Flu Treatment/Flu Prevention:</u> Oseltamivir / Tamiflu Rimantadine / Flumadine W5	<u>Flu Treatment/Flu Prevention:</u>	
HIV Antiviral Drugs <i>Multiple Generics available for Prescribing</i> W5	All <u>Other Single Source Brand</u> HIV Antiviral Drugs	All <u>Multi-Source Brand</u> HIV Antiviral Drugs
HIV Pre-Exposure Prophylaxis Drugs Tenofovir/Emtricitabine / Truvada S/E/P/A Req'd W5	Truvada (Emtricitabine/Tenofovir Disproxil (TDF))	Descovy (Emtricitabine/Tenofovir Alafenamide)

Anti-Infectives

GENERIC DRUGS	PREFERRED BRANDS	NON-PREFERRED BRANDS
Anaerobic Anti-Infectives Metronidazole / Flagyl Paromomycin Sulfate / Humatin Tinidazole / Tindamax W4		
Antiparasitics W4	Alinia (Nitazoxanide)	Egaten (Triclabendazole)
Antimalarials & Antiprotozoals Atovaquone/Proguanil / Malarone Hydroxychloroquine / Plaquenil Mefloquine / Lariam Quinine Sulfate / Qualaquin W4		Arakoda (Tafenoquine) Daraprim (Pyrimethamine) <small>100% Copay</small> Lampit (Nifurtimox)
Antihelmintic Drugs Ivermectin / Stromectol W4		Albenza (Albendazole) Biltricide (Praziquantel) Emverm (Mebendazole)

Antiemetics

GENERIC DRUGS	PREFERRED BRANDS	NON-PREFERRED BRANDS
Antiemetics (Assorted Use) Aprepitant / Emend Dronabinol / Marinol Granisetron / Kytril Meclizine / Antivert, VERTIN Ondansetron / Zofran, Zofran ODT Doxylamine/Pyridoxine / Diclegis Prochlorperazine / Compazine Promethazine HCL / Phenergan, Promethegan Supp. Trimethobenzamide / Tigan H6	Bonjesta ER' (Doxylamine Succinate/Vitamin B6) Transderm-Scop Patch (Scopolamine)	Akyntzeo (Netupitant/Palonosetron) <small>P/A Req'd</small> Anzemet (Dolasetron) Cesamet (Nabilone) Sancuso Patch (Granisetron) <small>P/A Req'd</small> Sustol Injectable (Ganisetron) <small>P/A Req'd</small> Syndros Oral Solution (Dronabinol) <small>P/A Req'd</small> Varubi (Ropiprant) Zuplenz Film (Ondansetron)

Neurologic: Parkinsons & Migraine Drugs

GENERIC DRUGS	PREFERRED BRANDS	NON-PREFERRED BRANDS
Anti-Parkinsons Drugs <p>Amantadine / Symmetrel Benzotropine / Cogentin Bromocriptine / Parlodel Carbidopa/Levodopa / Sinemet/CR, Parcopa Carbidopa/Levodopa/Entacapone / Stalevo Entacapone / Comtan Pramipexole / Mirapex, Mirapex ER Rasagiline / Azilect Ropinirole / Requip, Requip XL Tolcapone / Tasmar</p> <p>H6</p> <p><u>Parkinsons Motion/Dyskinesia Drugs:</u></p> <p>H6</p> <p><u>Psychosis Drugs:</u></p> <p>H8</p> <p>Anti-Migraine Drugs</p> <p><u>Triptans:</u> Sumatriptan Tablets & Injectables / Imitrex Sumatriptan / Naproxen Sodium Treximet^{100% Copay} {ALL Generic TRIPTAN Tablets}</p> <p><u>CGRP (Prevention):</u></p> <p><u>CGRP (Acute Treatment):</u></p> <p><u>Other Drugs:</u> Ergotamine / Ergomar Ergotamine/Caffeine / Cafergot Dihydroergotamine/ DHE 45, Migranal Nasal</p> <p>H3</p>	<p>Parkinsons Motion/Dyskinesia Drugs: Gocovriⁱ (Amantadine) Xadago^j (Safinamide)</p> <p>Psychosis Drugs:</p>	<p>Apokyn Injectable, Kynmobi SL Film (Apomorphine) Banzel (Rufinamide) Duopa Susp. Specialty Drug Formulary List

Specialty Drug Products

Specialty drugs are prescription medications that require special handling, administration or monitoring. These drugs typically treat complex and chronic conditions, including cancer, multiple sclerosis, various types of hepatitis, chronic kidney failure, organ transplants, rheumatoid arthritis and other diseases. Specialty drugs might be covered through either medical or prescription drug insurance. Under which benefit a specialty drug is covered usually depends on where the patient receives the drug. If the patient takes the drug orally or self-injects the drug at home, it is more likely to be covered through their prescription drug benefit, while if the patient receives the drug at a doctor's office or an outpatient clinic, it's more likely to be covered through the medical benefit.

Prescriptions for specialty drugs can be filled at a retail pharmacy, but not many pharmacies will dispense specialty drugs or provide the extra clinical and educational services required to properly manage specialty patients due to inventory costs. Additionally, some drug manufacturers limit the distribution of specialty drugs, making their drugs available only through designated, pre-certified specialty pharmacies. For more information about limited distribution drugs, please contact your clinical Account Manager.

Specialty Programs & Limits

Some specialty drugs below are noted with letters or symbols next to them. The letters and symbols refer to the requirements of the pharmacy benefit programs and are provided to help check which drugs may have a clinical program or limitations in place. The benefit plan determines how these medications may be covered.

P/A or P/A Req'd Prior Authorization – Physician is required to provide additional information to determine coverage.

P/A for Diagnosis Prior Authorization may be required for clinical diagnosis

Clinical P/A Prior Authorization may be required for clinical diagnosis

C-P/A Prior Authorization may be required for clinical confirmation

S/E Step Therapy – Trial of another drug is required before this drug is covered.

RECOMMENDED Product is preferred over other drugs listed in the assigned tier – step edit may or may not apply

100% 100% Copay may apply. Lower-cost or better clinical options are available.

Specialty Drug Product Qualifications

The P&T Committee, using current medical literature, has developed a “specialty” pharmacy product formulary comprised of Specialty Drug Products. To be considered a “Specialty Drug”, a drug should fall into at least six (6) of the following categories although still subject to assignment by the P&T Committee.

1. A drug that treats specific, mainly chronic, and often rare conditions; or is considered an orphan drug
2. A drug whose usage is initiated with a specialist
3. A drug typically not administered orally or topically
4. A drug that requires special handling
5. A drug whose use involves unique distribution channels, such as limited distribution management and specialized paperwork (REMS)
6. A drug that requires administration in a healthcare setting with oversight of a healthcare professional
7. A drug that costs more than a specific set amount per month
8. A drug whose usage requires high degrees of patient management, increased supervision, counseling, and/or education
9. A drug whose use often may result in patients requiring reimbursement assistance to maintain regimen

The current specialty pharmacy product listing is available from your Account Manager.

SPECIAL NOTES:

- CGRP medications can be found on page 11

Specialty Drug Copays

While the formulary placement of a drug is determined by the P&T Committee, the copays that are assigned to brand and generic drugs are determined by the copay established under each plan benefit design. Therefore, in many cases, the copay for a preferred brand specialty drug may be different than a preferred brand drug that is not deemed as a specialty drug. This often occurs with HIV, oncology, immunology, respiratory and many other drugs.

Additionally, drugs that are infused or administered intravenously often have different copays applied, especially when they are covered under a medical benefit. For more information about what a copay would be for a specific drug, the patient should contact their benefit office.

NOTE: If the member uses a member portal, online pricing tool or smartphone/tablet app, the copay returned may not always be as expected based on many factors, including whether the member's plan follows the formulary and the recommendations of the P&T Committee, how the plan even wants a given drug covered, what stage the member is in their deductible benefit if applicable, whether the claim is filled by an in or out of network provider, and if other member level coverage overrides have been entered.

Miscellaneous Notes

Miscellaneous Notes: Non-Listed Injectables, Infusion & Oral Products

Injectibles: There are therapeutic categories that contain injectable specialty drugs that are not listed in this formulary listing (PDL). If you have any questions as to the tier preference of a specific non-listed injectable specialty drug, please contact your account manager for more information. Injectables that require medical administration or medical/nursing support that not shown in this PDL.

Infusion: There are infused drugs administered at home or at a facility by a healthcare professional that require medical/nursing support. If one of those drugs is not listed, those medications should be processed through medical benefits.

Other Oral Products: Oral products (other than oral oncology and HIV drugs) that are not listed in this PDL should be considered having a Non-Preferred Brand copay.

Single Source Brand Oral Oncology and Immunosupresant Drugs: Unless noted, Single Source Brand oral drugs generally have a preferred brand copay applied, while Multi-Source Brand drugs have a non-preferred copay applied. Multi-Source Generic Oral Oncology and Immunosupresant drugs generally have a generic copay applied.

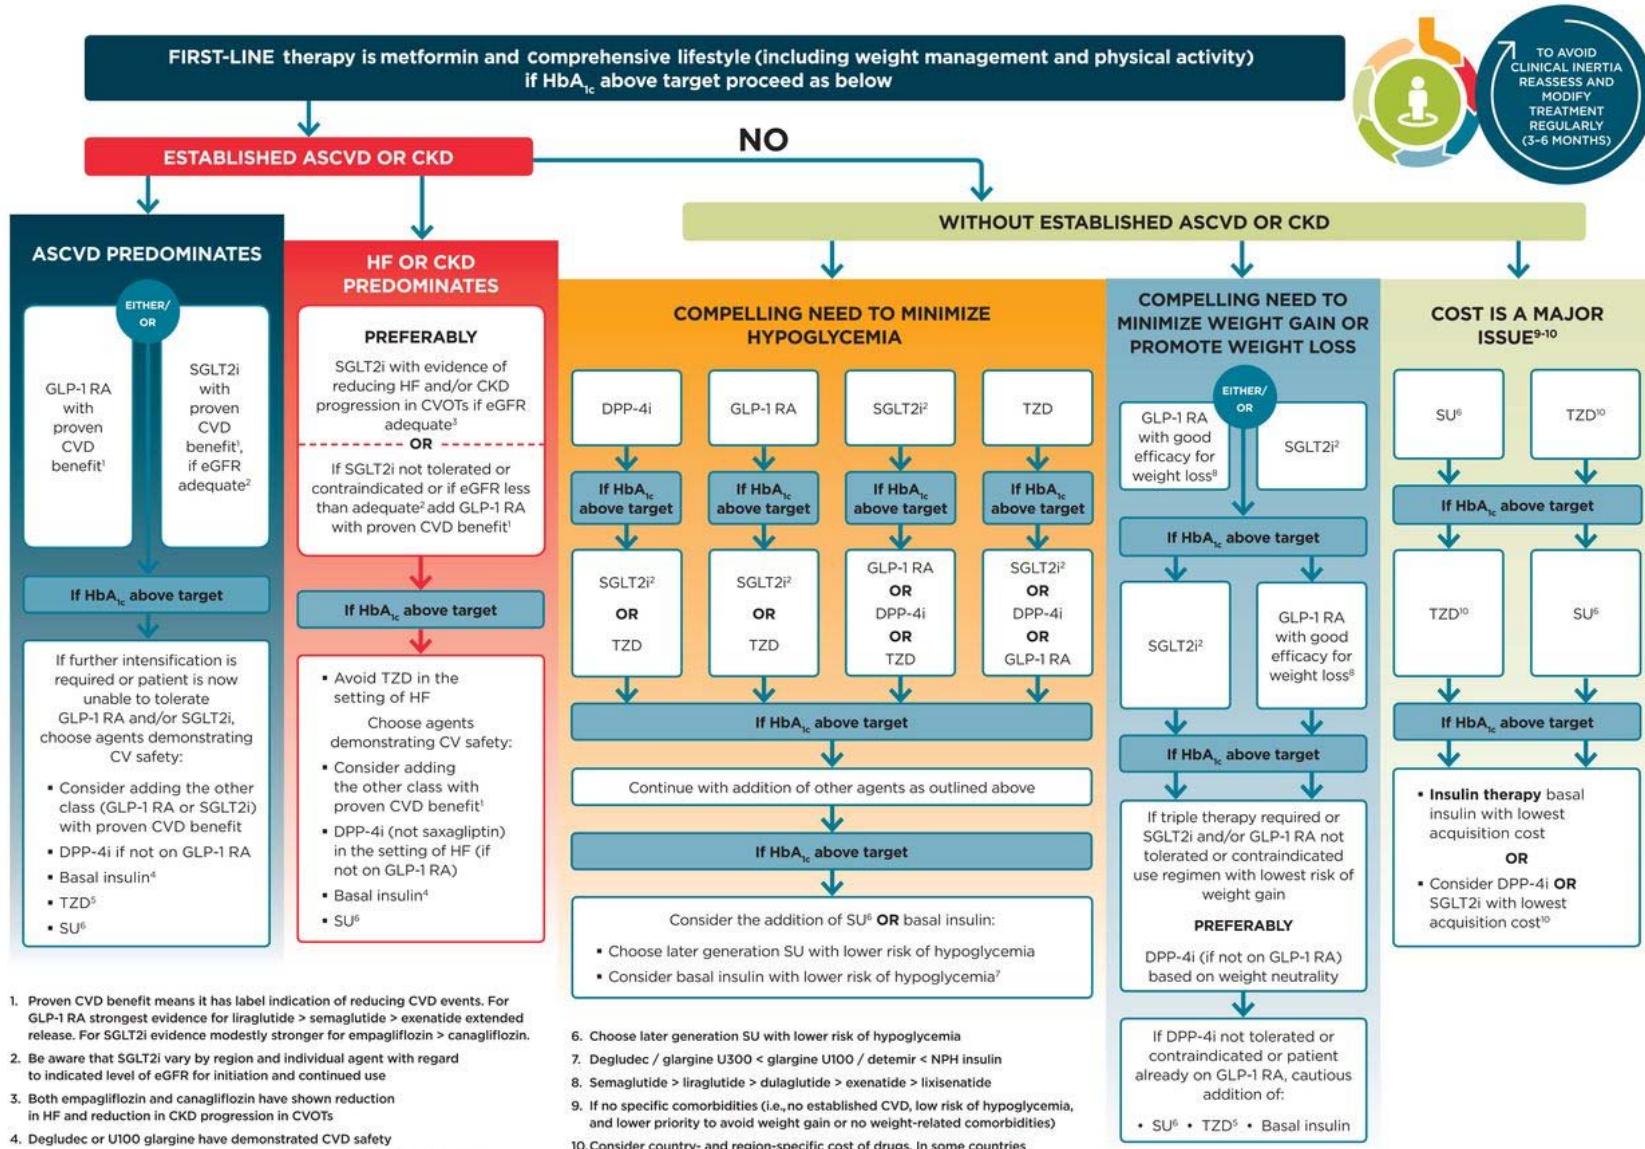

Clinical Guidelines

Clinical Guideline Sources

Clinical guidelines from recognized industry sources are utilized by our clinicians as reference for consistent treatment care. Using these guidelines, we assist physicians in understanding the “best practices” adopted by medical experts and healthcare professionals to manage and control the well-being of patients.

This section, which will be expanded over time contains some of the most predominant clinical protocols available:

- Diabetes Care Guidelines
- COPD Gold Guidelines

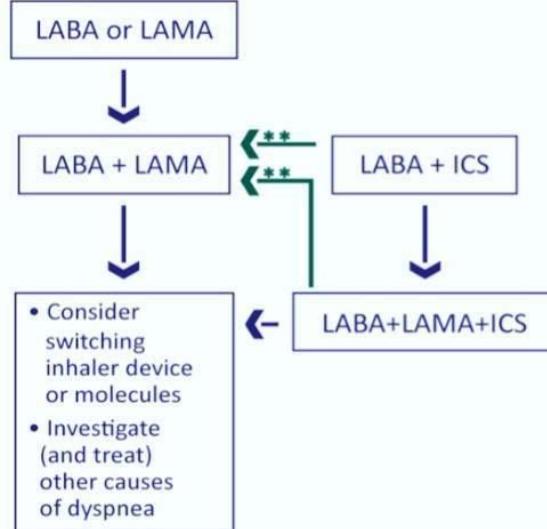

COPD GOLD Guidelines 2019

Categorize into COPD GOLD A-D

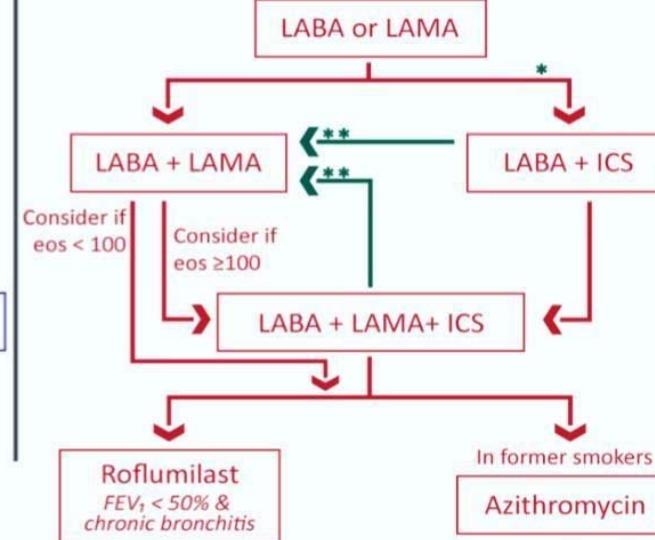

Initiate first-line Therapy

Follow-up based on further DYSPNEA or EXACERBATIONS

• DYSPNEA •

• EXACERBATIONS •

eos = blood eosinophil count (cells/ μ L)

* Consider if eos ≥ 300 or eos ≥ 100 AND ≥2 moderate exacerbations / 1 hospitalization

** Consider de-escalation of ICS or switch if pneumonia, inappropriate original indication or lack of response to ICS
